

I am strongly against cell phone usage on aircraft because of the following reasons:

- There is no hard evidence that cell phone use doesn't interfere with navigational instruments.
- Cell phone use would enable terrorists to coordinate a plan of action more effectively.
- The NPRM would leave it up to flight attendants to police the use of cell phones onboard the aircraft compromising our ability to maintain a safe, secure cabin environment and to conduct emergency evacuations.
- It would make an already tense cabin environment even more stressful. Comments from many passengers are: "This is the only quiet time I have."
